Claims 28-33 have been cancelled.

## Allowable Subject Matter

Claims 1-16 and 18-27 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 and 18 are allowable because the prior art does not teach or fairly suggest a system and method for measuring the total organic carbon (TOC) content of a sample of water that comprises using a plasma serve as the source of energy to oxidize TOC in a water sample to CO<sub>2</sub> for subsequent analysis. Busch teaches using the plasma to excite CO<sub>2</sub> atoms, having been formed by oxidation of TOC by other means, for IR analysis. All the depending claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Art Unit: 1743

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## **Drawings**

New corrected drawings are required in this application because they contain minor informalities and they are not formal drawings. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
